“Power for the 21st Century”

June 20, 2018

Subject: IL 2018 Renewable Resource
Forward Procurement Feedback

Attn: Mr. Anthony Star
Director, Illinois Power Agency

Dear Mr. Star:

Regarding the subject I offer the following public comment.

I suggest that after the impact or facility study is completed by the interconnecting utility (IU) and the study includes a date that that IU will interconnect the project then such date plus a reasonable time for testing and commissioning will be the date for first REC delivery, unless a later date was specified by the developer in the initial bid. This suggestion eliminates harm to the developer as a result of actions by the IU.

Regards,

Donald Walters, P.E.
Managing Director
