**Subject:** FW: [Commenter 10] feedback on Brownfield Site Photovoltaic Procurement

Director Star,

In response to your request for feedback, on the Nov 2018 IPA procurement for new brownfield site PV projects, I submit the following comments.

We have developed 8 PV projects in Illinois.

The reason we did not pursue this opportunity was that it combined the requirement to be a brownfield developer.

If you provided developers/lists of companies that do brown field development than we could both pursue the development of the projects within our capabilities.

I (perhaps others) found the combination of talents to be too much given the other opportunities.

Thank you
