

**Illinois Power Agency**  
**Program Evaluator, Illinois Solar for All Program (25-RFQ-01)**  
**Responses to Offeror Questions**  
**February 10, 2025**

1. *Are prospective subcontractors required to complete and submit a Request for Qualifications response if the subcontract only intends to support an Offerors whom is already submitting a response?*

**Answer:** No. Subcontractors do not submit a response to the Request for Qualifications ("RFQ"). Furthermore, Offerors do not need to identify their subcontractors in the response to the RFQ. Subcontractors will be identified in responses to the subsequent Request for Proposals ("RFP").

2. *If an Offeror is performing work for another State agency, Illinois utility, municipal authority, or other similar entity, is such work considered a conflict of interest, resulting in an Offeror not able to participate in the ILSFA Evaluator RFP?*

**Answer:** Proactive disclosure of potential conflicts is important to the Agency. Offerors should complete all sections of the RFQ and disclose any potential conflicts of interest as a component of the response. The Agency will evaluate all information provided through the Offeror RFQ response and make a subsequent determination.

3. *Will the Illinois Power Agency consider delaying the release of the RFP until after a forthcoming AESP conference being held in March 2025 to provide more time to those Offerors that may be attending that conference?*

**Answer:** The Agency does not intend to delay the ILSFA Evaluator RFP release date, currently targeted for March 5. The Agency will consider an appropriate due date for the RFP that will account for many evaluators participating in the AESP conference.
