

IPA Integrated Resource Planning Workshop #1: Scenarios

April 7, 2026

Respondent Name	Respondent Organization	Respondent Email Address	Respondent Zip Code
Tace James	Constellation	tace.james@constellation.com	60607

Question 1

Do the proposed scenarios reflect a reasonable range of the most impactful and most uncertain drivers? If not, what key drivers or assumptions should be added, removed, or modified?

None

Question 2

Are there additional scenarios that should be considered to better capture plausible future outcomes? If so, which of the current proposed scenarios would you remove? If so, which of the current proposed scenarios would you remove?

None

Question 3

What data sources, studies, or inputs should be used to inform key scenario parameters?

Consistent with our previous comments, the IRP should build upon the previous and ongoing work at RTOs and stay closely coordinated so the IRP reflects continuing developments. The IRP should incorporate the most up-to-date PJM BRA results to accurately reflect the most up-to-date data available. For example, the Capacity Emergency Transfer Limit for the ComEd zone is now 1,586 MW for the 28/29 BRA compared to 6,110 MW for the 26/27 BRA. This is a significant drop in the import capability for the ComEd zone as compared to the assumptions used for the Resource Adequacy study last year. Spreadsheets available at <https://www.pjm.com/markets-and-operations/rpm>.

Question 4

Do these load scenarios capture a reasonable range of the most impactful drivers? If not, what specific drivers of load are missing?

None

Question 5

For this study, sensitivities are defined as changes to a single input or assumption within a given scenario. Please suggest 1-3 sensitivities that you believe are particularly valuable to test. For each sensitivity include:

-Which input should be varied (resource cost, interconnection timelines, etc.)

-What scenario the sensitivity should be applied to

None

Question 6

Are you interested in being added to our distribution list to be kept up-to-date on news and important information related to the IRP? If so, please provide your contact information in the following section.
