September 30, 2026 Addendum to Appendix F

This addendum to “Appendix F: ComEd Load Forecast and Supply Portfolio” is intended to identify changes made to Appendix F following the August 17, 2026 publication of the Draft 2027 EPP.

Following the publication of the IPA’s Draft 2027 Electricity Procurement Plan (“EPP”) ComEd informed the IPA of an error impacting data represented in “Appendix F: ComEd Load Forecast and Supply Portfolio.”

On September 3, 2026, ComEd notified IPA that it had identified errors in its load forecast resulting in slightly higher load volumes across a series of months and years. On September 28 and 29, ComEd provided an updated Appendix F to correct this error. The appendix was updated to contain procurement results from IPA’s Fall 2026 Block Energy Procurement to ensure subsequent procurement volumes reflect targets needed to satisfy their energy procurement targets.

The revisions were made to correct the overall level of forecasted volumes and were carried through the updated procurement volume tables and hourly load files. No revisions were made to the underlying methodology or assumptions.
