

Illinois Power Agency Announces Selection of Participants for the Self-direct Program

April 20, 2023

The Illinois Power Agency (“IPA” “Agency”) has announced the approval of two applications for the 2023-2024 inaugural program year of the Large Customer Self-direct Renewable Portfolio Standard Compliance Program (“Self-direct Program”). The participants are:

Participant	Facility Supplying Renewable Energy Credits (RECs)
Goldframe LLC (Meta)	Lincoln Land Wind
Verizon	Blooming Grove Wind Energy Center

The Agency set a program size of 3 million RECs for the inaugural 2023-2024 program year. As discussed in the [self-direct FAQ](#), since there are only two participants, the Agency is releasing this range of REC quantities in order to protect the confidentiality of REC retirement quantities. The expected aggregated REC quantity for the approved participants in the 2023-2024 delivery year is between 500,000 and 1 million RECs.

Applications were reviewed and selected based on the protocol outlined in Section 6.6.3 of the 2022 Long-Term Plan. Section 1-75(c)(1)(R) requires that the self-direct RPS compliance program take effect in the delivery year commencing June 1, 2023.

For additional information on program size and bill credit rate analysis, visit the [Self-direct Program webpage](#) on the IPA website.
