

Ameresco Inc. - Response to ABP Comment Request

To whom it may concern,

Below are our comments regarding the ABP request:

1a. An annual opening on June 1st with the December 2021 block being open for less than a year is an appropriate strategy. This allows the block timing to align with program years and allows the December block to be an intermediate measure while the long term plan is developed.

1c. For blocks with an initial allocation of two years, it is appropriate for the next block opening to be June 1, 2023.

Regards,
Kristin Bernstein
