**Subject:** [External] Ameresco Inc - Chapter 10 LTP Feedback

Below is our feedback on Chapter 10.

Topic 1

1. Project workforce should be limited to the construction of the project as that is where diversity improvements and bringing in diverse staff is most feasible.
2. Total number of persons reduces the administrative burden and therefore cost of meeting these requirements. Combining hours and numbers of individuals would be overly onerous.

Topic 2

2b. A feasible strategy for tracking persons and EEC is eligible as long as they were eligible when the project was awarded a REC contract. This will manage the risk to developers and projects as they cannot control if or when employees or subcontractors move.

Regards,  
Kristin
