

Appendix A

Statutory Compliance Index

Recognizing the multiple, overlapping legal requirements for the Procurement Plan, the IPA has assembled an index of the requirements of the IPA Act and the Public Utilities Act and a citation for which section(s) of the plan address each of the requirements and/or standards. The IPA notes that although the list is intended to be broad, it is not comprehensive of every legal requirement related to the Procurement Plan. Omission of a statutory or other requirement should not be interpreted as waiver of the requirement by the IPA or a suggestion that the Commission criteria for review should be altered in any way.

Section	Legal Authority
	<i>Plan Participation</i>
	<i>220 ILCS 5/16-111.5(a)</i>
Ch. 1, 3.1	"A small multi-jurisdictional electric utility that on December 31, 2005 served less than 100,000 customers in Illinois may elect to procure power and energy for all or a portion of its eligible Illinois retail customers in accordance with the applicable provisions set forth in this Section and Section 1-75 of the Illinois Power Agency Act. This Section shall not apply to a small multi-jurisdictional utility until such time as a small multi-jurisdictional utility requests the Illinois Power Agency to prepare a procurement plan for its eligible retail customers." (a)
	<i>Plan Requirements</i>
	<i>220 ILCS 5/16-111.5(b)</i>
App A	"A procurement plan shall be prepared for each electric utility consistent with the applicable requirements of the Illinois Power Agency Act and this Section." (b)
Ch. 3	"Each procurement plan shall analyze the projected balance of supply and demand for eligible retail customers over a 5-year period with the first planning year beginning on June 1 of the year following the year in which the plan is filed." (b)
Ch. 7	"The plan shall specifically identify the wholesale products to be procured following plan approval" (b)
Ch. 2	"[The plan] shall follow all the requirements set forth in the Public Utilities Act and all applicable State and federal laws, statutes, rules, or regulations, as well as Commission orders." (b)
2.3, 3.2, 3.3, 3.4	"Hourly load analysis. This analysis shall include:
<i>Id.</i>	(i) multi-year historical analysis of hourly loads;
<i>Id.</i>	(ii) switching trends and competitive retail market analysis;
<i>Id.</i>	(iii) known or projected changes to future loads; and
<i>Id.</i>	(iv) growth forecasts by customer class." (b)(1)
2.3, Ch. 3	"Analysis of the impact of any demand side and renewable energy initiatives. This analysis shall include:
<i>Id.</i>	(i) the impact of demand response programs and energy efficiency programs, both current and projected; for small multi-jurisdictional utilities, the impact of demand response and energy efficiency programs approved pursuant to Section 8-408 of this Act, both current and projected; and
2.3, Ch. 3, 4.1, 4.2, 4.3	(ii) supply side needs that are projected to be offset by purchases of renewable energy resources, if any." (b)(2)

Section	Legal Authority
2.3, 2.5, Ch. 7	"A plan for meeting the expected load requirements that will not be met through preexisting contracts. This plan shall include:
3.4	(i) definitions of the different Illinois retail customer classes for which supply is being purchased;
2.5, 7.4	(ii) the proposed mix of demand-response products for which contracts will be executed during the next year. For small multi-jurisdictional electric utilities that on December 31, 2005 served fewer than 100,000 customers in Illinois, these shall be defined as demand-response products offered in an energy efficiency plan approved pursuant to Section 8-408 of this Act. The cost-effective demand-response measures shall be procured whenever the cost is lower than procuring comparable capacity products, provided that such products shall:
<i>Id.</i>	(A) be procured by a demand-response provider from eligible retail customers;
<i>Id.</i>	(B) at least satisfy the demand-response requirements of the regional transmission organization market in which the utility's service territory is located, including, but not limited to, any applicable capacity or dispatch requirements;
<i>Id.</i>	(C) provide for customers' participation in the stream of benefits produced by the demand-response products;
<i>Id.</i>	(D) provide for reimbursement by the demand-response provider of the utility for any costs incurred as a result of the failure of the supplier of such products to perform its obligations thereunder; and
<i>Id.</i>	(E) meet the same credit requirements as apply to suppliers of capacity, in the applicable regional transmission organization market;
2.3, Ch. 4, App E, F, & G	(iii) monthly forecasted system supply requirements, including expected minimum, maximum, and average values for the planning period;
2.3, 2.4, Ch. 7	(iv) the proposed mix and selection of standard wholesale products for which contracts will be executed during the next year, separately or in combination, to meet that portion of its load requirements not met through pre-existing contracts, including but not limited to monthly 5 x 16 peak period block energy, monthly off-peak wrap energy, monthly 7 x 24 energy, annual 5 x 16 energy, other standardized energy or capacity products designed to provide eligible retail customer benefits from commercially deployed advanced technologies including by not limited to high voltage direct current converter stations, as such term is defined in Section 1-10 of the Illinois Power Agency Act, whether or not such product is currently available in wholesale markets, annual off-peak wrap energy, annual 7 x 24 energy, monthly capacity, annual capacity, peak load capacity obligations, capacity purchase plan, and ancillary services;
2.3, Ch. 7	(v) proposed term structures for each wholesale product type included in the proposed procurement plan portfolio of products; and
2.3, Chs. 5, 6, 7	(vi) an assessment of the price risk, load uncertainty, and other factors that are associated with the proposed procurement plan; this assessment, to the extent possible, shall include an analysis of the following factors: contract terms, time frames for securing products or services, fuel costs, weather patterns, transmission costs, market conditions, and the governmental regulatory environment; the proposed procurement plan shall also identify alternatives for those portfolio measures that are identified as having significant price risk and mitigation in the form of additional retail customer and ratepayer price, reliability, and environmental benefits from standardized energy products delivered from commercially deployed advanced technologies, including, but not limited to, high voltage direct current converter stations, as such term is defined in Section 1-10 of the Illinois Power Agency Act, whether or not such product is currently available in wholesale markets." (b)(3)

**2024 IPA Electricity Procurement Plan
Appendix A: Statutory Compliance Index**

2.3	“The procurement plan shall include, for load requirements included in the procurement plan, the process for
<i>Id.</i>	(i) hourly balancing of supply and demand and
2.3, 6.4	(ii) the criteria for portfolio re-balancing in the event of significant shifts in load.” (b)(4)
	220 ILCS 5/16-111.5(b)
Ch. 8	In conducting the procurement of electricity or other products, beginning January 1, 2022, the Agency shall not procure any products or services from persons or organizations that are in violation of the Displaced Energy Workers Bill of Rights, as provided under the Energy Community Reinvestment Act at the time of the procurement event or fail to comply the labor standards established in subparagraph (Q) of paragraph (1) of subsection (c) of Section 1-75.
	20 ILCS 3855/1-20
1.1, 2.1, Ch. 6	“[The Agency is authorized to] develop electricity procurement plans to ensure adequate, reliable, affordable, efficient, and environmentally sustainable electric service at the lowest total cost over time, taking into account any benefits of price stability, for electric utilities that on December 31, 2005 provided electric service to at least 100,000 customers in Illinois and for small multi-jurisdictional electric utilities.” (a)(1)
2.1	“[The Agency is authorized to] conduct competitive procurement processes to procure the supply resources identified in the electricity procurement plan, pursuant to Section 16-111.5 of the Public Utilities Act.” (a)(2)

Section	Legal Authority
	Approval Procedure
	220 ILCS 5/16-111.5
2.1	“Approval and implementation of the procurement plan shall be subject to review and approval by the Commission according to the provisions set forth in this Section.” (b)
2.1	“The procurement process set forth in Section 1-75 of the Illinois Power Agency Act and subsection (e) of this Section shall be administered by a procurement administrator and monitored by a procurement monitor.” (c)
3.1, 3.4	“[E]ach Illinois utility procuring power pursuant to this Section shall annually provide a range of load forecasts to the Illinois Power Agency by July 15 of each year, or such other date as may be required by the Commission or Agency. The load forecasts shall cover the 5 year procurement planning period for the next procurement plan and shall include hourly data representing a high-load, low-load and expected-load scenario for the load of the eligible retail customers. The utility shall provide supporting data and assumptions for each of the scenarios.” (d)(1)
2.2	“[T]he Illinois Power Agency shall prepare a procurement plan by August 15th of each year, or such other date as may be required by the Commission. The procurement plan shall identify the portfolio of demand-response and power and energy products to be procured.” (d)(2)
2.2	“Copies of the procurement plan shall be posted and made publicly available on the Agency's and Commission's websites, and copies shall also be provided to each affected electric utility.” (d)(2)
<i>Id.</i>	“An affected utility shall have 30 days following the date of posting to provide comment to the Agency on the procurement plan. Other interested entities also may comment on the

**2024 IPA Electricity Procurement Plan
Appendix A: Statutory Compliance Index**

	procurement plan. . . All comments shall be posted on the Agency's and Commission's websites." (d)(2)
<i>Id.</i>	"During this 30-day comment period, the Agency shall hold at least one public hearing within each utility's service area for the purpose of receiving public comment on the procurement plan." (d)(2)
2.2	"Within 14 days following the end of the 30-day review period, the Agency shall revise the procurement plan as necessary based on the comments received and file the procurement plan with the Commission and post the procurement plan on the websites." (d)(2)
2.2	"Within 5 days after the filing of the procurement plan, any person objecting to the procurement plan shall file an objection with the Commission." (d)(3)
2.2	"The Commission shall approve the procurement plan, including expressly the forecast used in the procurement plan, if the Commission determines that it will ensure adequate, reliable, affordable, efficient, and environmentally sustainable electric service at the lowest total cost over time, taking into account any benefits of price stability." (d)(4)
	<i>20 ILCS 3855/1-75</i>
2.1	"The Agency shall each year, beginning in 2008, as needed, issue a request for qualifications for experts or expert consulting firms to develop the procurement plans in accordance with Section 16-111.5 of the Public Utilities Act." (a)(1)
2.1	"The Agency shall each year, as needed, issue a request for qualifications for a procurement administrator to conduct the competitive procurement processes in accordance with Section 16-111.5 of the Public Utilities Act." (a)(2)
Cover Memo, 2.2	"The draft procurement plans are subject to public comment, as required by Section 16-111.5 of the Public Utilities Act." (e)
N/A	"The Agency shall submit the final procurement plan to the Commission." (f)

Appendix A: Statutory Compliance Index**

Section	Legal Authority
	<i>Clean Coal Portfolio Standard, Generally</i>
	<i>20 ILCS 3855/1-75(d)</i>
2.6, 7.5	“The procurement plans shall include electricity generated using clean coal.” (d)(1)
<i>Id.</i>	“It is the goal of the State that by January 1, 2025, 25% of the electricity used in the State shall be generated by cost-effective clean coal facilities.” (d)(1)
N/A	“For purposes of this subsection (d), ‘cost-effective’ means that the expenditures pursuant to such sourcing agreements do not cause the limit stated in paragraph (2) of this subsection (d) to be exceeded and do not exceed cost-based benchmarks, which shall be developed to assess all expenditures pursuant to such sourcing agreements covering electricity generated by clean coal facilities, other than the initial clean coal facility, by the procurement administrator, in consultation with the Commission staff, Agency staff, and the procurement monitor and shall be subject to Commission review and approval.” (d)(1)
N/A	“Notwithstanding the requirements of this subsection (d), the total amount paid under sourcing agreements with clean coal facilities pursuant to the procurement plan for any given year shall be reduced by an amount necessary to limit the annual estimated average net increase due to the costs of these resources included in the amounts paid by eligible retail customers in connection with electric service to: . . . (E) . . . the total amount paid under sourcing agreements with clean coal facilities pursuant to the procurement plan for any single year shall be reduced by an amount necessary to limit the estimated average net increase due to the cost of these resources included in the amounts paid by eligible retail customers in connection with electric service to no more than the greater of (i) 2.015% of the amount paid per kilowatthour by those customers during the year ending May 31, 2009 or (ii) the incremental amount per kilowatthour paid for these resources in 2013. These requirements may be altered only as provided by statute.” (d)(2)
N/A	“Initial clean coal facility. In order to promote development of clean coal facilities in Illinois, each electric utility subject to this Section shall execute a sourcing agreement to source electricity from a proposed clean coal facility in Illinois (the “initial clean coal facility”) that will have a nameplate capacity of at least 500 MW when commercial operation commences, that has a final Clean Air Act permit on June 1, 2009 (the effective date of Public Act 95-1027), and that will meet the definition of clean coal facility in Section 1-10 of this Act when commercial operation commences.” (d)(3)
N/A	“Effective date of sourcing agreements with the initial clean coal facility. Any proposed sourcing agreement with the initial clean coal facility shall not become effective unless the following reports are prepared and submitted and authorizations and approvals obtained.” (d)(4)
2.6, 7.5	“Re-powering and retrofitting coal-fired power plants previously owned by Illinois utilities to qualify as clean coal facilities.” (d)(5)
